PROFESSIONAL SUMMARY

Data Analytics and Visualization enthusiast with hands-on experience in building interactive dashboards and analyzing real-world datasets. Proficient in data cleaning, transformation, and creating insightful visualizations using Tableau. Skilled at identifying patterns, tracking key performance metrics, and delivering data-driven insights to support business decisions.

EDUCATION

Bachelor of Technology (Artificial intelligence)	2024 - 2028
Newton School of Technology, Rishihood University	Grade: 8.0/10.0
Intermediate (Class XII)	2022 - 2023
Raghukul Vidyapeeth	Grade: 86.0%
Matriculation (Class X)	2020 - 2021
Fatima Sr. Sec. School	Grade: 97.3%

PROJECTS

Airbnb NYC Market Analysis ([Github](#)) ([Demo](#)) April 2026

Performed end-to-end EDA on NYC Airbnb listings — handling missing values, outlier removal, and standardizing categorical fields. Analysed pricing distribution across NYC boroughs and room types. Built visual dashboards covering availability patterns, review frequency, and host listing concentration to surface actionable market insights.

- Performed end-to-end exploratory data analysis on NYC Airbnb dataset using **Tableau**, including missing value treatment, outlier handling, and categorical data standardization.
- Built interactive dashboards analyzing **pricing trends across boroughs and room types**, along with availability patterns, review frequency, and host distribution to derive actionable market insights.

European Sales Data ([Demo](#)) April 2026

Developed an interactive **European Sales Dashboard** using Tableau to analyze regional sales performance, profitability, and customer distribution. The dashboard highlights key business metrics including total sales, profit, and customer count, along with monthly sales trends and product-wise performance. A geographical map visualization provides country-level sales insights, enabling identification of high-performing regions.

- Built an interactive Tableau dashboard analyzing **€1M+ sales data**, tracking key KPIs such as revenue, profit, and customer base across European markets.
- Visualized **monthly sales trends, product-level performance, and country-wise distribution**, enabling identification of top-performing regions and high-revenue product categories.

Flight Delay Analysis ([Github](#)) ([Demo](#)) February 2026

Built an interactive **Flight Delay Analysis Dashboard** in Excel to analyze airline performance and delay patterns across multiple dimensions. The dashboard provides insights into key metrics such as total flights, airline distribution, average arrival and departure delays, and day-wise delay trends.

- Developed an interactive Excel dashboard analyzing **4,800+ flights across 14 airlines**, uncovering trends in arrival and departure delays using dynamic filters and KPI metrics.
- Designed data visualizations to identify **high-delay airlines and peak delay days**, improving interpretability of operational performance through structured EDA and dashboard storytelling.

SKILLS

Computer Languages: Machine Learning, Python, TypeScript, HTML, CSS, JavaScript, PHP

Data Tools: PostgreSQL, TensorFlow, NumPy, Power BI

Software Packages: Pandas, MySQL, Next.js, Tailwind CSS, Prisma ORM, React, Redux, Node.js, Express JS, MongoDB

Others: Git and Github, Docker, Spreadsheet, LLM, LangChain, Generative AI, LangGraph, Hugging Face, Tableau
