PROFESSIONAL SUMMARY

Data Analyst with a practical approach to transforming raw data into meaningful insights. Experienced in Python, SQL, Excel, and Tableau/Power BI, with hands-on work in data cleaning, EDA, and dashboard development. Adept at uncovering patterns, evaluating key metrics, and translating complex datasets into clear, decision-focused insights. Driven by curiosity and a continuous focus on improving analytical thinking and real-world problem-solving through data.

EDUCATION

Bachelor of Technology (Data Science)

Newton School of Technology, Rishihood University

2024 - 2028

Grade: 7.3/10.0

Intermediate (Class XII)

Presidency Global School

2023 - 2024

Grade: 75.6%

Matriculation (Class X)

St. Karen's Secondary School

2021 - 2022

Grade: 86.2%

PROJECTS

Airbnb Dashboard ([Github](#)) ([Demo](#))

April 2026

- Developed an Airbnb Client Decision Dashboard using Python, Pandas, NumPy, Excel/CSV, and Tableau to help users choose the best Airbnb stay based on budget, location, room type, and demand.
- Performed data cleaning, preprocessing, and feature engineering using Python by handling missing values, removing duplicates, standardizing data, and creating calculated fields like Price Category, Demand Score, and Value Score.
- Built 4 interactive Tableau dashboards with KPIs, univariate, bivariate, and multivariate visual analysis, enabling insights on pricing trends, best-value neighborhoods, customer demand patterns, and stay preferences through dynamic filters and client-focused storytelling.

Flight-Delay ([Github](#)) ([Demo](#))

March 2026

- **Tech Stacks:** Microsoft Excel (PivotTables, PivotCharts, Slicers), Data Analysis
- **Description:** Designed and developed an interactive flight delay analytics dashboard to uncover hidden patterns in airline operations, enabling data-driven insights into performance, delay distribution, and systemic inefficiencies.
- **Features:** Engineered KPI-driven dashboards tracking delay metrics and on-time performance across airlines, Performed comparative analysis to identify underperforming and efficient carriers, Conducted time-series analysis to uncover peak delay periods (weekday, monthly, hourly trends), Diagnosed root causes of delays including weather, carrier, and air traffic factors, Built interactive filtering system using slicers for dynamic exploration and decision support, Translated raw aviation data into actionable insights for operational optimization

SKILLS

Computer Languages: Python, HTML, CSS, JavaScript

Data Tools: NumPy

Software Packages: Pandas, Figma, Chart.js, Express JS, React Native, Tailwind CSS, Prisma ORM, React, Node.js, Excel, MySQL

Soft Skills: Leadership, Teamwork

Others: Tableau, Git and Github, Firebase, Postman, Canva, Problem-Solving, Analytics, OAuth 2.0

EXTRA-CURRICULAR ACTIVITIES

Participated in a **Community Outreach Program**, contributing to social engagement initiatives.
