PROFESSIONAL SUMMARY

Data Analyst skilled in Python, SQL, and Google Sheets, with experience in data cleaning, exploratory data analysis (EDA), and dashboard development. Analyzed real-world OTT and market datasets to uncover insights on user behavior, revenue optimization, and economic trends, enabling data-driven decision making.

EDUCATION

Bachelor of Technology (Artificial Intelligence) Newton School of Technology, Rishihood University	2024 – 2028 CGPA: 7.56 / 10.0
Senior Secondary (Class XII) Govt. Model Sr. Sec. School	2023 – 2024 75.8%

PROJECTS

Netflix-Style OTT User Behavior Analysis (GitHub) Tools: Google Sheets, Pivot Tables, Python, Pandas, Feature Engineering - Cleaned and processed a 10,000-record OTT dataset to 6,685 valid users using mode/median imputation, deduplication, and type conversion; engineered maturity level feature for cohort analysis. - Designed a KPI Framework (AWD, CR, ARPU, Inactive Rate) and identified Premium+ underperformance — only \$12.8K (9%) of total revenue vs Standard Plan's \$51.6K — recommending bundles for 12–15% MRR uplift. - Segmented users into Golden Cohort (age 26–35, >85% retention) and At-Risk Cohort (under-18, mobile); built interactive Google Sheets dashboard with slicers across age, device, genre, and plan.	March 2025
Airbnb NYC Market Analysis (GitHub) (Dashboard) Tools: Python, Google Colab, Pandas, Matplotlib, Seaborn, Tableau, EDA - Performed end-to-end EDA on NYC Airbnb listings dataset — handling missing values, outlier removal, and standardizing categorical fields across thousands of records in Google Colab. - Analysed pricing distribution across NYC boroughs and room types; built visual dashboards covering availability patterns, review frequency, and host listing concentration to surface actionable market insights.	February 2025
Business Sales Performance Capstone (Dashboard) Tools: Excel, Google Sheets, Pivot Tables, KPI Design, Dashboard - Built an end-to-end sales performance dashboard tracking revenue, profit margins, and regional trends across multiple product categories. - Designed interactive slicers and pivot-driven KPI panels to enable drill-down analysis by region, salesperson, and time period for actionable business insights.	January 2025
E-Commerce Perfume Sales Dashboard (Dashboard) Tools: Tableau, EDA, Data Cleaning, Market Segmentation - Developed an interactive Tableau dashboard visualizing e-commerce perfume sales across categories, price bands, and geographies. - Identified top-performing SKUs and customer purchase patterns to inform inventory and marketing strategy, improving revenue visibility.	December 2024

SKILLS

Analytics & BI: Google Sheets, Pivot Tables, Slicers, Google Colab, Dashboard Design, KPI Frameworks

Programming: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (Basics), JavaScript

Data Skills: EDA, Data Cleaning, Feature Engineering, ARPU/CLV Modelling, Churn & Cohort Analysis, Market Segmentation

Visualisation: Tableau, Matplotlib, Seaborn, Google Sheets Dashboards

Other: Git, GitHub, Statistical Analysis, Business Strategy, Revenue Analysis

ACHIEVEMENTS & LEADERSHIP

- **Smart India Hackathon (SIH) Participant** | National Level — Applied data-driven problem solving and cross-functional teamwork.
- **District Chess — 2nd Place** | Strategic Thinking — reflects structured decision-making and performance under pressure.
- **District Basketball Participant** — demonstrates teamwork, discipline, and competitive spirit.
